

How can digital communications technology help poor countries meet their MDG targets?

Write your suggestions in the right-hand column. Two rows have been partially filled in for you.

Millennium Development Goal	How digital communications (mobiles and the internet) could help us meet this goal
Eradicate extreme poverty and hunger	
Achieve universal primary education	
Promote gender equality and empower women	<i>Women in repressive societies might use the internet (blogging or other forms of communication) to draw global attention to their lack of rights.</i>
Reduce child mortality	
Improve maternal health	
Combat HIV and AIDS, malaria and other diseases	<i>Mobiles could be used to help identify medical conditions for people living in remote areas.</i>
Ensure environmental sustainability
