Shackleton's Endurance

Teaching Resources for Primary

Sections	Resources	Assembly Ideas
 1: The Expedition The story so far The Trans-Antarctic Expedition Map of Shackleton's planned route. 	Parallel Lives - How do we know? - Marvellous Maps - Planning for an Expedition	A World of Wonder

Shackleton Resources

These resources for primary pupils compliment the online book resource 'Shackleton's Endurance' which, tells the story of Shackleton's famous Trans- Antarctica Expedition. On this expedition, Shackleton's ship the Endurance was lost to the ice, yet Shackleton eventually got all of her crew home without a single loss of life. The book has six sections and each is supported by a suite of teaching resources, teacher notes and ideas for assemblies.

The resources also draw on the contemporary Expedition 'Endurance22', sailing aboard the Agulhas II, with historian and media personality Dan Snow, which left Cape Town in February 2022 for the Weddell Sea to search for the wreck of Endurance. Through the '**Parallel Lives**' strand, pupils can explore some of the differences between the two voyages, then and now.

There will be opportunities to dip in and sample resources from different lessons or start at the beginning and work your way through to build a coherent and longer unit of work. Ideas will be provided for both KS1 and KS2.

1: The Expedition

- 2. The Crew and Boats
- 3. Setting out
- 4. Abandon Ship
- Staying Alive
- 6. Uncharted

The Expedition

The first part of the story gives a brief background to this age of exploration in which there was competition to get to the South Pole from different countries and their explorers. It gives us the outline of Shackleton's bold idea to try and be the first person to cross the entire continent of Antarctica on foot after being narrowly beaten to the Pole by Roald Amundsen.

Teacher Notes

Introducing the ideas of 'expedition' and 'explorers'

Key Questions

- What is an explorer? What do they do and why?
- Who was Ernest Shackleton?
- What is Antarctica? Where is it and what is it like and why?
- When did this happen?
- What is an expedition?
- How do we know about this story? What evidence is there?
- How is planning an expedition different today?
- Where would you like to explore and why?

Getting Started

What does the very first image show? It is a cross between a map and a drawing and an aerial image, showing the Endurance in amidst the ice. Elicit some first impressions from pupils about what they think they are looking at.

On page 3, there is another map showing Antarctica and across the continent it says 'Unexplored'. Do pupils think that must have been exciting? You can either now or later, compare the outline of this map to a current day map of Antarctica and see how accurate the outline is.

Read the first section of the book. What is an explorer? What do explorers do and what do they look like? Encourage pupils to say what they know and find out if anyone can name an explorer. Ask pupils to talk about places they have enjoyed exploring and how they felt. Or to identify places they would like to explore and why.

Explain that in at that time in history, there was a lot of competition to get to unseen and unreached places first. Exploration of remote places was especially dangerous 100 years ago, ask pupils if they can give reasons why. This might include lack of modern communications, incomplete maps, not knowing what lay ahead.

Find Antarctica on a map and establish some of the key facts about it.

Possible Activities

Antarctica

- For Key Stage 1 pupils use globes and atlases to locate and find Antarctica. This gives an
 opportunity to introduce or reinforce the learning about continents and oceans, and
 associated language such as North and South Pole, Equator, as well as the names of the
 continents and oceans.
- Using comparative maps of the Arctic and Antarctic Circles, draw out the differences and similarities, especially noting that whilst both are cold, polar regions, Antarctica is a large continent surrounded by ocean, whereas the Arctic is generally an area of ocean, surrounded by land. See the fact file for further ideas. Pupils could create Venn diagrams showing these similarities and differences.
- Find the Weddell Sea using an atlas. Look to investigate other seas around Antarctica and their names.
- For Key Stage 2, recap the learning about the continents, oceans and polar regions from KS1 and also hot and cold places. Use this relevant vocabulary and introduce latitude, noting the five major parallels: the Polar Circles, the Tropics and the Equator, on globes and maps. Using maps of climate zones, such as those on Digimaps

www.digimapforschools.edina.ac.uk ask pupils to note the pattern of climate and latitude and discuss what other variable might influence climate – such as altitude and nearness to oceans. Using enquiry, find out significant climate and weather data for parts of Antarctica,

- For example: coldest temperature, highest wind speed, average September temperature and average March temperature. Add this information to a map.
- Using digital maps or drawing by hand, create a map showing the route of the Endurance from London to South Georgia, marking in the places mentioned in the story, and identifying and labelling the oceans, continents, countries as appropriate. If using a programme like Digimap for Schools, pupils could measure the distances travelled on each leg of the journey.
- Using maps and atlases, find the route described in the expedition plan. Discuss why / why
 not, Shackleton's proposed plan to use the team from the Aurora to meet them halfway with
 supplies, was a good idea.

Resources: Atlases and polar stereographic maps of the North and South Polar Regions for comparison.

noting its huge size.

Explorers

- Key Stage 1 and 2
- Why do people explore? Ask pupils to draw an explorer and list their qualities and skills. Who can be an explorer? Challenge any misconceptions about gender and ethnicity by using some positive examples such as Barbara Hillary, the explorer who made history as the first African American woman to reach the North and South Poles, in her seventies. Or Harpreet Chandi, the first woman of colour to complete the expedition to the South Pole alone. There is a linked assembly idea with some examples of polar explorers including Shackleton. Pupils could add their own research about polar explorers and create their own list of favourites.
- Ask pupils to write a piece about themselves as explorer and say where in the world they
 would go and why.
- Discuss how we can be explorers of the everyday by finding new places, spots, views and
 features that you've not noticed before. Plan an explorer walk around the school looking for
 new discoveries. Take photographs, describe what you've found and add it to a map. Plan
 a mini expedition in the locality to a place not walked to before and think about the safest
 route.

Geography

Key stage 1

Pupils should develop knowledge about the world, the United Kingdom and their locality. They should understand basic subject-specific vocabulary relating to human and physical

geography and begin to use geographical skills, including first-hand observation, to enhance their locational awareness.

Pupils should be taught to:

Locational knowledge

- name and locate the world's seven continents and five oceans

Human and physical geography

- identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles.
- use basic geographical vocabulary

Geographical skills and fieldwork

- use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage
- use simple compass directions (North, South, East and West) and locational and directional language [for example, near and far; left and right], to describe the location of features and routes on a map
- use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features;
- devise a simple map; and use and construct basic symbols in a key.

Key Stage 2

Pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world's most significant human and physical features. They should develop their use of geographical knowledge, understanding and skills to enhance their locational and place knowledge.

Locational knowledge

- locate the world's countries, using maps to focus on ... South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities.
- identify the position and significance of latitude, longitude, Equator, Northern Hemisphere,
 Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the
 Prime/Greenwich Meridian and time zones (including day and night.

Human and physical geography

describe and understand key aspects of:

- physical geography, including climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle
- human geography, including types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water

Geographical skills and fieldwork

 use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied

 use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world.

History

Key stage 1

Pupils should develop an awareness of the past, using common words and phrases relating to the passing of time.

- know where the people and events they study fit within a chronological framework and identify similarities and differences between ways of life in different periods.
- use a wide vocabulary of everyday historical terms.
- ask and answer questions, choosing and using parts of stories and other sources to show that they know and understand key features of events.
- understand some of the ways in which we find out about the past and identify different ways in which it is represented.

Pupils should be taught about:

- events beyond living memory that are significant nationally or globally
- the lives of significant individuals in the past who have contributed to national and international achievements. Some should be used to compare aspects of life in different periods.

Key Stage 2

Pupils should continue to develop a chronologically secure knowledge and understanding of British, local and world history, establishing clear narratives within and across the periods they study. They should note connections, contrasts and trends over time and develop the appropriate use of historical terms. They should regularly address and sometimes devise historically valid questions about change, cause, similarity and difference, and significance. They should construct informed responses that involve thoughtful selection and organisation of relevant historical information. They should understand how our knowledge of the past is constructed from a range of sources.

Pupils should be taught about:

 a study of an aspect or theme in British history that extends pupils' chronological knowledge beyond 1066

Taking it further

There are some other activities linked to this first section of the book about using evidence and how navigation has changed.

Vocabulary

See the Book glossary and encourage pupils to develop this with their own collected vocabulary.

Links to other Areas of learning

English: speaking and listening, opportunities for reports, creative writing and descriptive writing, diaries, letters, lists and labels.

Mathematics: opportunities to measure, record, and to create and present data
