

### **Instructions for making a 3-D model**

You will need: Thick card (but still able to be cut), photocopies of contour line diagram, scissors, pens.

- 1) Photocopy the contour line diagram 7 times
- 2) On each copy cut round the contours.
- 3) Stick each layer onto thick card.
- 4) Start with an A4 sheet of thick card as your base.
- 5) Stick the first layer on top of the base.
- 6) Stick a small square of thick card on top.
- 7) Then stick the next layer, then stick another small square of thick card.
- 8) Continue until all layers are stuck. Ensure that there is the same gap between each layer.
- 9) Pupils need to add the contour lines onto the model.
- 10) Features could be labelled if you are making several different models.
