Edit all that you have learnt over the last three lessons to create an online revision page or a revision booklet that could be used by students like yourselves to revise the topic of ocean acidification.

Include a section on the 'bigger picture' – in other words, how does ocean acidification fit into the wider framework of global warming? How are the two processes linked?

The video clip [Ocean acidification: Connecting science, industry, policy and public](#) is a good source of information on this.
