

Noughts & Crosses

Aim: to score more points than your partner by placing words into the grid which relate to each other and explaining this relationship successfully to your partner.

1 – Person A went first and scored 1 point for placing their word.

2 – Then person B went & scored 1 point for placing their word + a further 2 points because it could be related to the word it was placed next to.

economic

Government

Tourist industry

4 - If person B can place a word in this box, they will score 1 point for the word, a further 2 points for relating it to 'government' and a further 4 points for completing the row by relating their word to both 'tourist industry' and 'economic'. A total of 7 points for one word!!!

3 - Person A scored 1 point for their word + 4 further points because it related because it could be related to BOTH of the adjacent words.
